Respiratory Masking Program – to rapidly increase delivery of oxygen and food to the brain; to increase the rate and depth of breathing and to improve general physiology

Sensory Stimulation Program – to create a perfect light reflex in order to see detail

Incline Plane – to help movement on the floor

Patterning Program – a sensory program to teach the brain how it feels to move

The cost for this visit for Maksim was \$4,050.00. In addition to the original cost of this program supplements and materials are also needed which varies in cost with each visit.

Maksim will be seen by our staff every six months for re-evaluation and treatment for five days each visit. Maksim must be accompanied by both of his parents for each of these visits where they will receive her new program.

Very truly yours,

Re: Maxim Yankov

The staff of The Institutes for the Achievement of Human Potential has made diagnosis of brain injury and developmental delay for this individual who is on our intensive treatment program.

Every six months, the above individual, along with his parents will have a re-evaluation appointment here at The Institutes for the Achievement of Human Potential.

The cost of his next five day intensive treatment visit is \$5,250.00 USD with an additional charge for translation of \$565.00 USD.

The need of supplies and vitamins differ at each visit. The average range is usually between \$300.00 - \$700.00 USD.

Maxim's next visit is scheduled for October 26, 2015 through October 30, 2015.

Very truly yours,

Leland J. Green, MD
Medical Director
